
SUMMARY

- Frontend Engineer with **5+ years** building and leading production **React**, **Next.js**, and **TypeScript** applications. Experienced owning frontend architecture end-to-end, from legacy audits and migration strategy to leading teams, across fast-moving startups.

SKILLS

- **Programming Languages:** JavaScript, TypeScript
- **Frontend:** React, Next.js, Tanstack (Query, Router, Table), Redux, Redux Toolkit, Zustand, XState Tailwind CSS, SCSS, MaterialUI
- **Backend:** Node.js, Express.js, Socket.IO, Redis, PostgreSQL, MongoDB
- **Tools:** Git, Docker, Figma, Jest, Cypress

WORK EXPERIENCE

Frontend Engineer (Contractor)
SecondBrain

Apr 2026 – Present
Lyon, France (Remote)

- Frontend developer on a healthcare/pharma SaaS platform, working across multiple applications within a shared monorepo architecture.
- Building and maintaining features using React, TypeScript, Redux Toolkit, and MUI, collaborating closely with product and engineering.

Lead Frontend Engineer
Lablabee Company

Mar 2024 – Aug 2025
Oran, Algeria (Office)

- Led a frontend team of 4 on a B2B telco-cloud platform. Ran code reviews, sprint planning, and cross-team coordination with backend, design, and product.
- Designed and maintained frontend architecture with a focus on scalability, performance, and long-term maintainability.
- Audited a legacy codebase (200+ unused components, dependencies from 2018). Built a tech debt classification and roadmap, negotiated 20% sprint capacity for remediation.
- Migrated from CRA + Redux to Vite + React Query, significantly reducing build times and state management boilerplate.
- Drove product feature planning with stakeholders and PM, aligning frontend priorities with business goals and delivery timelines.

Frontend Engineer (Contractor)
Viabirds Technologies GmbH

Feb 2022 – Sep 2023
Salzburg, Austria (Remote)

- Migrated the primary product from client-side React to Next.js 12 (early adoption), achieving 96+ Lighthouse scores for SEO and performance.
- Improved and modernized legacy codebases across client projects, reducing maintenance overhead and improving developer experience.
- Shipped features across multiple client teams and tech stacks: React, React Native, Next.js, and Spryker/Twig.
- Integrated CMS and third-party services into client-facing applications.

Frontend Engineer (Contractor)
Ously Games GmbH

Sep 2022 – July 2023
Frankfurt , Germany (Remote)

- Built new features and UI for an online gaming platform using Next.js, translating Figma designs to production code.
- Contributed to front-end performance improvements across the application.

Frontend Engineer & UI/UX designer
blurry.ai

Jan 2021 – January 2022
Vienna, Austria (Remote)

- Sole frontend developer and designer in a team of 5 at an early-stage AI startup. Built a web application for selective image and video blurring using canvas-based rendering.
- Owned the frontend lifecycle from user research and Figma prototyping to React implementation. Collaborated with the founder to define product requirements and roadmap.

UI/UX Designer
Ronan Medical

Feb 2021 – July 2021
Prague, Czech Republic (Remote)

- Designed a medical dashboard application with a focus on intuitive, user-friendly workflows.
- Built a comprehensive design system in Figma ensuring consistency across products and platforms.

PROJECTS

- **PageForge** : SaaS landing page builder with drag-and-drop editor, Stripe billing, and A/B testing. Next.js 15, XState + Zustand, Drizzle ORM, Auth.js. [Live demo + GitHub on [portfolio](#)]
- **FlowChat** : Real-time team messaging app with channels, presence tracking, and full-text search. React, Socket.IO, Redis pub/sub, PostgreSQL, Turborepo. [Live demo + GitHub on [portfolio](#)]

EDUCATION

Master in Distributed Networks and Information Systems
University of Science and Technology of Oran (USTO-MB)

Sep 2018 - Oct 2020

Bachelor in Information Technology
University of Science and Technology of Oran (USTO-MB)

Aug 2015 - Aug 2018

LANGUAGES

- **English** (Fluent)
- **French** (Native)
- **Arabic** (Native)
